

Problem-Solution Fit

Date	15 March 2026
Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	5 Marks

Problem-Solution :

1. CUSTOMER SEGMENT(S) [CS] • Government Policymakers. • Researchers • Development Organizations (UNDP/NGOs) • Economists • Data Analysts • Educational Institutions	6. CUSTOMER LIMITATIONS EG. BUDGET, DEVICES [CL] • Limited technical knowledge • Limited budget • Slow internet in some regions • Lack of advanced analytical tools • Limited access to updated datasets	5. AVAILABLE SOLUTIONS Existing Solutions: • Manual spreadsheets analysis • UNDP reports • Statistical software PROS [AS]: • Reliable historical data • Widely accepted • Detailed reports CONS [AS]: • Time-consuming • No instant prediction • Requires expert knowledge • Limited automation
--	--	--

2. PROBLEMS / PAINS + ITS FREQUENCY [PR]

- Manual HDI calculation is time-consuming.
- Difficult to analyze multiple development indicators together.
- Lack of quick prediction tools.
- Frequent need to compare countries.
- High demand for accurate development analysis.

9. PROBLEM ROOT / CAUSE [RC]

- Manual evaluation takes significant time.
- Multiple indicators must be analyzed simultaneously.
- Complex statistical calculations.
- Lack of automated prediction systems.
- Difficulty interpreting development data.

7. BEHAVIOR + ITS INTENSITY [BE]

- Frequently analyzes country development data.
- Regularly compares HDI indicators.
- Uses reports for planning.
- Searches for faster prediction methods.

3. TRIGGERS TO ACT [TR]

- Need for faster policy decisions.
- Requirement to identify development gaps.
- Need for data-driven planning.
- Regular publication of development reports.
- Research and government analysis activities.

10. YOUR SOLUTION [SL]

Develop a Machine Learning-based HDI Prediction System using Python, Scikit-learn, Flask, Pandas, and NumPy. The system predicts the Human Development Index category (Very High, High, Medium, or Low) using Life Expectancy, Mean Years of Schooling, Expected Years of Schooling, and GNI per Capita. It provides fast, accurate, and user-friendly predictions to support governments, researchers, and development organizations in planning and decision-making.

8. CHANNELS OF BEHAVIOR [CH]

ONLINE :

- Government portals
- UNDP website
- World Bank website
- Research portals
- Web-based HDI Prediction System

4. EMOTIONS BEFORE [EM]

- Confused
- Frustrated
- Concerned about accuracy
- Time pressure

AFTER [EM]

- Confident
- Satisfied
- Better informed

OFFLINE:

- Government offices
- Universities
- Research centers
- Development organizations
- Policy meetings
